DINHDONG24@PROTON.ME
DATE OF BIRTH: 02/05/2000

Middle+ Cloud Engineer with 3+ years experience in designing and managing cloud solutions on AWS. Possesses strong expertise in Linux-based system administration, ensuring optimal performance and scalability.

Middle+ Platform Engineer with 1+ year experience in design, deploy and manage onpremise Kubernetes Cluster

These are technology stacks that I have experienced:

- **Microservices:** Docker (Docker Swarm), Podman, Kubernetes, ECS, EKS
- **CI/CD:** Gitlab, Jenkins
- **GitOps:** ArgoCD
- **Linux OS:** Ubuntu, Debian, CentOS, AL2, AL2023, Fedore, openSUSE
- **IaC tools:** Terraform, Pulumi
- **Configuration tools:** Ansible
- **AWS services:** EC2, S3, RDS, IAM, EFS, VPC, ECS, EKS, Lambda, Pipelines...
- **Agile Workflow:** Jira, Confluence, Redmine

My greatest strengths are:

- Ability to **learn new things** and **deep dive into technical problems**.
- Adaptive to work **globally**, with **multiple teams**, and **to work independently**.
- Good at all **4 skills with English**.

Desirable in a new workspace in the future:

- Working openly & professionally.
- Working with other team members to design, proposal, deploy and manage resilient infrastructure systems.
- Building and trainng strong infrastructure team

EXPERIENCE

SYSTEM ADMIN / CLOUD ENGINEER / DEVOPS ENGINEER

RIKKEISOFT CORP

- Building develop onpremise system for small, medium size development teams
- Automate testing, scaning and deployment with CI/CD
- Monitoring, optimize system infrastructure for performance, stability and reliability
- Design, propose and deploy AWS cloud architecture

PROJECT: PA*

- Debrief: Configure, monitor, build CI/CD and optimize MES system performance, stability and reliability
- Technology: Kubernetes, ELK, Prometheus-Grafana, Kubegres, OpenEBS, Jenkins, Scripting Tools(Golang, Shell, Python), IaC(Helm chart)
- Team Size: 150 members
- Duration: June 2024 -> Dec 2025

PROJECT: SUM*

- Debrief: Design & operate migration Sum** system from On-Premise to AWS cloud
- Technology: AWS Services(EFS, Organization, IAM, EC2, S3, Lambda, Cloudwatch, Oracle RDS, DMS, VPC, Transit Gateway, ECS), IaC(Terraform), Scripting Tools(Golang, Shell, Python), Gitlab
- Team Size: 10 members
- Duration: Dec 2023 -> May 2024

PROJECT: SALES***

- Debrief: Migration Sales*** system from Digital Ocean to AWS
- Technology: AWS Services(EC2, S3, RDS, VPC, IAM), IaC(Terraform), Scripting Tools(Shell), Gitlab
- Team Size: 10 members
- Duration: June 2023 -> Dec 2023

PROJECT: WI*

- Debrief: Design, create & maintain AWS micro-service systems for Wi* company
- Technology: AWS Services(EKS, S3, RDS, VPC, Code Pipeline, Code Deployment, IAM), IaC(Terraform)
- Team Size: 5 members
- Duration: Jan 2023 -> June 2023

PROJECT: QU**

- Debrief: Migration systems from On-Premise to AWS. Creating, updating & testing for system scripts
- Technology: AWS Services(EC2), Scripting Tools(Shell, Python)
- Team Size: 6 members
- Duration: Dec 2022 -> June 2023

Dec 2022 - Dec 2025

DEVOPS ENGINEER

FIM - FHO

- Manage CI/CD pipelines to automage the integration & deployment
- Automate server management with Python/Nestjs (backend) & React (frontend)
- Configure Nginx in web server for specific use case

Aug 2022 - Oct 2022

WEB DEVELOPER

VS DOLL COMPANY

- Develop and maintaining the production website in AWS, customizing the theme & website functions for desired purposes.
- Tracking the potential errors/crashes.

Jan 2022 - April 2022

INTERNSHIP BACKEND DEVELOPER

KATANAI COMPANY

- Writing the unittest, typing hint to engage the code quality, reduce the preparation time.
- Get familiar with GCP, Jupyter notebooks (Google Colab) for trainng & testing models.

April 2021 - June 2022

BACKEND DEVELOPER

LITEXTENSION

- Working with lots of famous E-commerce platform for data migration and website UI (Shopify, Wordpress, Magento, Shopware, ...)
- Building the staging environment for testing & maintaining. (For most used Linux-distributions)
- Engaging software performance (Backend); refactoring & upgrade algorithms to boost its performance.

Sep 2020 - July 2022

SKILLS

PROGRAMMING LANGUAGES

TECHSTACK & TOOLS

WORKFLOW

- Agile Development & Scrum
- Software Development Life Cycle
- CI/CD Model

EDUCATION / CERTIFICATE

AWS SOLUTION ARCHITECT - ASSOCIATE
2023 - 2026

365 DATA SCIENCE COURSE
PYTHON PROGRAMMER BOOTCAMP

COMPUTER SCIENCE - WEB DEVELOPMENT TRACK

Feb 2020 - Aug 2020

ONLINE DOCUMENTATION & EBOOKS
LINUX SYSTEM ADMINISTRATOR; PROGRAMMING PHILOSOPHY & DOCKER

- Kali Linux Documentation.
- Linux Bible
- Learn Docker - Fundmentals of Docker 19.x
- Pragmatic Programmer

PERSONAL PROJECTS

- Linux Command-line Cheatsheet
- Cẩm nang lập trình viên thực dung (Pragmatic Programmer) - WIP
- (Forked) hairpin-proxy: proxy for internal validation for cert-manager
- (Forked) genericssl: Self Signed SSL Certificate Generator
- (Forked) rancher-single-tool: simplifies the process for upgrading, backing up, restoring and installing single server rancher installations
